Logistical Tools for Clinicians

Chief, Central Materiel Services
Brooke Army Medical Center
210-916-1449

Introduction

- The following tools described in this brief are all available either from the local med log officer/NCO, hospital med supply officer/NCO or on the internet and require no password.

- Use these tools in conjunction with the theater stockage list to place your orders. Check with your med supply officer at least weekly to see what is on your due-out list for delivery and to ensure that the orders were indeed placed.

- Ordering something not on the stockage list can take up to 30-45 days longer to get to you vice ordering from the list and getting it within 20 days. Do not wait until you are at zero balance to place an order due to these time frames. Order on a regular basis to ensure a continuous flow of supplies.

- This brief will discuss how to use MEDSILS, the Unit Data Repository, and the Joint Deployment Formulary.

Classes of Supply

Class I – rations and food supplies

Class II – general supplies

Class III – petroleum, oils, lubricants (POL)

Class IV – engineer and construction supplies

Class V – ammunition

Class VI – personal items

Class VII – major end items (trucks, tanks)

Class VIII – medical supplies and equipment

Class IX – repair parts

Class X – supplies for civil military support

Federal Supply Classes
(first four numbers of a national stock number)

- 6505 – drugs, biologicals, and reagents
- 6510 – bandages
- 6515 – medical supplies and equipment
- 6520 – dental supplies and equipment
- 6525 – radiological supplies and equipment
- 6530 – surgical supplies and equipment
- 6532 – medical clothing and linen
- 6540 – ophthalmic supplies and equipment
- 6545 – medical sets, kits, and outfits
- 6550/6600 – laboratory supplies and equipment

MEDSILs is a web-based system that permits users to search on-line for equipment and Class VIII items. The search can be conducted by NIIN, Line Item number, Catalog number, or by nomenclature. The first four categories on this page will be of most use to clinicians and logisticians. The consumable and support items report lists all of the support items required to go with a piece of equipment and will be discussed later.

Go to USAMMA internet at www.usamma.army.mil and click on DoD MEDSILS radio button. On next page, click on any blue-highlighted MEDSILS word and you will arrive here.

Select which service you would like to search under and enter the last nine digits only of the National Stock Number (NSN). The last 9 digits are called the NIIN. After entering the digits, select the Submit button.

This is the NSN you typed in.
DLSC Cage gives you manufacturer data. Click the Submit under Army segments and you will be shown the following slide.

If a photo is available, the ICON will show you what it looks like.

The green highlighted SLC is a Shelf Life Code. Click it and it will show you a table listing the shelf life of items with that code letter or number.

If a photo is available, the ICON will show you what it looks like.

The green highlighted SLC is a Shelf Life Code. Click it and it will show you a table listing the shelf life of items with that code letter or number.

USAMMA
U.S. ARMY MEDICAL MATERIEL AGENCY - FORT DETRICK, MARYLAND

Shelf Life Code

SLC
A code asigned to a shelf life item to identify the period of time beginning with the date of manufacture/cure/assembly/pack and terminated by the date by which an item must be used (expiration date) or subjected to inspection/test/resotration/disposal action.

Type I
An individual item of supply determined through an evaluation of technical test data and/or actual experience to be an item with a definite nonextendable period shelf life.

Type II
An individual item of supply having an assigned shelf life period that may be extended after completion of inspection/test/restorative action.

TYPE I	TYPE II	SHELF LIFE PERIOD
0	0	Nondeteriorative
A		1 month
B		2 months
C	1	3 months
D		4 months
E		5 months
F	2	6 months
G	3	9 months
H	4	12 months
J		15 months
K	5	18 months

Phrase code data will help you determine if there is an equivalent or a replacement item for the NSN you are researching.
Simply change the search criteria from "DLSC cage" to "DLSC phrase" and hit submit. If there is data, it will show immediately. You can click the single letter code for a description of what it means.

If there are any established relationships between the NSN you are looking up and another NSN, it will show the other NSNs along with the phrase code letter describing the support relationship.

This NSN identifies the "W" NSN or the NSN under which the piece of equipment was established. Each piece of equipment should have a "W" NSN as the base requirement from which all doctrine and procurements derive their characteristics.

This NSN is an earlier version of this same Propaq patient monitor. Upgrades and package changes often require new NSNs to differentiate them from their cousins.

Phrase Code Definitions

Phrase Code	Phrase Definition	Explanation
A	**Consolidation**	Indicates that the NSN is to be consolidated with the related item. The items of supply are identical or completely interchangeable.
C	**Canceled-Replaced by (NSN)**	Indicates that the NSN was assigned in error to more than one item of supply. Field activities must physically re-identify stocks on hand to the appropriate NSN reflected in related NSN field.
D	**Change to FSC**	Indicates that the FSC class for the item has been changed.
E	**Replaced by (NSN)**	Indicates the NSN is replaced by the interchangeable preferred related NSN. (Stocks will be used until exhausted).
F	**When Exhausted**	Indicates that the NSN is replaced by the preferred related NSN. Must be used in combination with phrase code 7. (The phrase code 7 will appear on the preferred NSN with the exhausted NSN reflected in the related field).
G	**Replaces (NSN)**	Indicates that the NSN is the replacement for and is interchangeable with the related NSN. This new replacement NSN will not be issued until the supply of the replaced item is exhausted.
H	**Suitable Substitute (NSN)**	Indicates that the NSN is an authorized substitute for the related NSN.
J	**Interchangeable with**	Indicates that the NSN of record and the related NSN are completely interchangeable, one for the other. Preferred NSN relationship is not implied and stocks under the NSNs will not be consolidated.
S	**Stock as (NSNs) (Used for AAC "J" NSNs)**	Indicates that the NSN is applicable to the related NSN (ACC "W") item which was cataloged for authorization and procurement purposes. When manufacturer's name and identification become known for each new procurement source, new NSNs with Phrase Code "S" will be reflected on the related ACC "W" NSN.
V	**Discontinued Without Replacement**	Indicates the NSN is be discontinued without replacement. Stocks on hand will be issued and used until exhausted.
Y	**Equivalent to (NSN)**	Indicates the NSN has physical and performance characteristics identical to the related NSN. The items of supply differ only in the unit quantity and/or unit of issue.

The tab above will list the essential characteristics of the item. It will describe the capability and will identify any end item that a consumable works with.

The SNOM and LNOM are the short and long nomenclature of the item. The SNOM is limited to 21 places, while the LNOM is much longer, so we try to use the LNOM to give you a better idea of the item.

The Army data is on the bottom of the first page, below the nomenclature lines. The most important areas are highlighted.

The AAC code is an acquisition code and should be either J or L.

The U/I is the unit of issue and can be a variety of sizes. If it is anything other than EA, then the field Q/E for quantity expression will tell you how many are in that package, for example U/I may be PG and the Q/E could be 00000025 for a package of 25.

The running banner "Click here to view Support Items" will take you to a table that identifies all consumables and accessories that go with a piece of equipment, complete with their NSNs. This information is also repeated in the Equipment Handbooks on the USAMMA webpage.

The LIN is a code used to delineate how many of what equipment is authorized. Many NSNs can reside under one LIN.

Use the MEDSILS database in conjunction with the theater stockage list to help you find items you are looking for. This database works with pharmacy items and NDCs as well. If you should come across a number that looks like an NSN but has the letters "NCM" in the middle, do not use that number. That is a number that has not been put into the system yet and is only a placeholder. If you have any questions about codes or other data used in MEDSILS, click the Tutorial tab at the top of the page.

Another tool to help sort out items and perhaps find equivalents is with the Unit Data Repository (UDR). It is on a CD ROM and every medical logistics office gets one. We'll show you how to use that next.

Insert the UDR CD and it will automatically launch. Under the search tool at the top of the page, click and select "Medical/Surgical" and that will open another window.

If MEDSILS should ever be down, you can also check out NSNs via WebFLIS at https://www.webflis.dlis.dla.mil/WEBFLIS/ASPscripts/pub_search.aspx

This is the search window that opens up for searching in the UDR. Simply fill out any one of the fields below and click "Search" to execute the search. The FSC is the Federal Supply Class and is the first 4 numbers of the NSN. The NIIN is the last 9 numbers of the NSN.

Generic/Brand Name or Nomenclature

Detail   Equivalent

This is the results page of your search in the UDR. It will show all applicable fields above and then list up to 150 records for items matching your search. This search was for just "IV tubing" so it shows associated items like stopcocks and pediatric items also. You can highlight any item you want to look at and then click the "Detail" button below to get the characteristics, which are the same as in the MEDSILS database. If you want to find similar items, click the "Equivalent" button for that information.

Joint Deployment Formulary

- Available on the DMSB website at www.dmsb.army.mil

- JDF is listed under "Quick Links" on the left side of the page
- Reviewed by tri-service panel of pharmacists and is updated every other month
- Contains the NSN, NDC #, trade name, generic name and unit of issue
- Items from the JDF are stocked in theater. Items NOT on the JDF may still be procurable, but may take longer.

DMSB ANNOUNCEMENTS

- Welcome -

Welcome to the **new DMSB Web Page**. Our goal is to publish pertinent, timely information about the DMSB and its mission of standardization of medical materiel in peace and wartime operations. We have streamlined our format in an effort to help you gather the information you need. You will be allowed access to our secure data in the near future.

Until that time, please continue to **contact us** directly for any data requests that you have.

The Defense Medical Standardization Board (DMSB), formally known as the Joint Readiness Clinical Advisory Board (JRCAB), located at Ft. Detrick, in Maryland, is a joint activity under the direction, authority, and control of the Assistant Secretary of Defense (Health Affairs). Since our inception in 1945, the DMSB has been the focal point for medical materiel standardization within the Department of Defense (DoD).

The DMSB consists of flag and general officers who represent each of the military services, OASD(HA), the J4, DLA, and JFCOM. We are supported by a staff of clinicians, logisticians, pharmacists, information management, and support personnel from all Services.

DMSB Mission

The DMSB is the Joint voice of clinical experts on matters of

Expeditionary Medicine and Medical Logistics.

DMSB ANNOUNCEMENTS

- Welcome -

Welcome to the **new DMSB Web Page**. Our goal is to publish pertinent, timely information about the DMSB and its mission of standardization of medical materiel in peace and wartime operations. We have streamlined our format in an effort to help you gather the information you need. You will be allowed access to our secure data in the near future.

Until that time, please continue to contact us directly for any data requests that you have.

efense Medical Standardization Board (DMSB), formally as the Joint Readiness Clinical Advisory Board (JRCAB), at Ft. Detrick, in Maryland, is a joint activity under the on, authority, and control of the Assistant Secretary of e (Health Affairs). Since our inception in 1945, the DMSB en the focal point for medical materiel standardization within the Department of Defense (DoD).

The DMSB consists of flag and general officers who represent each of the military services, OASD(HA), the J4, DLA, and JFCOM. We are supported by a staff of clinicians, logisticians, pharmacists, information management, and support personnel from all Services.

DMSB Mission

The DMSB is the Joint voice of clinical experts on matters of Expeditionary Medicine and Medical Logistics

USAMMA POC: Materiel Acquisition Directorate, 301-619-7403, DSN 343-7403
UNIT PRICE: $18,940.00

Operator Familiarization: CD-ROM is available.

System Description: The M Series CCT features a three-channel display for ECG and up to two invasive pressures with ranges covering arterial, pulmonary arterial, central venous or intracranial pressure as well as two temperature channels. Of course, it also provides you all the non-invasive parameter options of the M Series including SpO_2, $EtCO_3$, NIBP, and fully interpretive 12-lead ECG.

- ZOLL XL Battery for longer transport times
- Transport-ready design
- Easy-to-read display
- M Series technology and simplicity
- Full range of parameters for a full range of patients
- Flexible color display
- Quick, easy connections
- Ready to gather and share critical data

USAMMA FAQ (Frequently Asked Questions)

1. Who should I contact in USAMMA? [Show Answer]
2. Did you know that USAMMA now has a full staff of clinicians available to provide clinical information regarding products and medical assemblages? [Show Answer]
3. How do I:

- How do I find a component listing for Medical Equipment Set (MES), Medical Materiel Sets (MMS), or Unit Assemblages (UA)? [Show Answer]
- Where can I find information about the MES, Humanitarian Assistance (HA) Augmentation Set? [Show Answer]
- What is the LIN authorization for the Combat Life Saver (CLS) Bag? [Show Answer]
- I am a 68A assigned to a division medical company. What TMDE am I authorized to have and how can I get TMDE? [Show Answer]
- I have excess Medical Equipment Sets (MESs), Medical Materiel Sets (MMSs), or excess non-expendable medical equipment. What do I do with it? [Show Answer]
- I see there are new Unit Assemblage Listings for my Medical Equipment Sets (MESs). How can my unit get the lastest and most modern MESs available? [Show Answer]
- How do I make a recommendation to add, change or delete an item to a Unit Assemblage, Set, Kit or Outfit? [Show Answer]
- Where can I locate Acronyms used by USAMMA? [Show Answer]
- How do I order Supply Catalogs? [Show Answer]
- How do I receive a USAMMA CDROM or USAMMA publications? [Show Answer]
- How do I report recurring medical equipment problems or issues? [Show Answer]
- How do I subscribe to the Medical Materiel Quality Control Messages (MMQCs)? [Show Answer]

4. I am deployed and need help getting my particular medical materiel, equipment, or sets. Who do I contact at USAMMA? [Show Answer]
5. My unit is deploying:

- How can USAMMA help? [Show Answer]
- How can we get the required Chemical Defense Materiel? [Show Answer]
- I am preparing to deploy; how can I find out what equipment the unit I am replacing is leaving behind as Theater Provided Equipment (TPE)? [Show Answer]

USAMMA FAQ (Frequently Asked Questions)

1. Who should I contact in USAMMA? Show Answer

2. Did you know that USAMMA now has a full staff of clinicians available to provide clinical information regarding products and medical assemblages? Hide Answer

USAMMA now employs a staff of both active duty and civilian clinicians within the Materiel Acquisition Directorate. Active duty officers include an operating room nurse, a pharmacist, and a laboratory officer. Civilian clinicians include two registered nurses and a physician assistant, all with prior Army clinical experience.

3. How do I:

- How do I find a component listing for Medical Equipment Set (MES), Medical Materiel Sets (MMS), or Unit Assemblages (UA)? Show Answer
- Where can I find information about the MES, Humanitarian Assistance (HA) Augmentation Set? Show Answer
- What is the LIN authorization for the Combat Life Saver (CLS) Bag? Hide Answer

  The Combat LifeSaver Bag sets, UAs 0245 and 1245, do not require a separate LIN. The sets are authorized by FORSCOM through the Common Table of Allowances (CTA) 8-100, Army Medical Department Expendable/Durable Items. Please access the Combat Lifesaver Bag link on the USAMMA Homepage.

- I am a 68A assigned to a division medical company. What TMDE am I authorized to have and how can I get TMDE? Show Answer
- I have excess Medical Equipment Sets (MESs), Medical Materiel Sets (MMSs), or excess non-expendable medical equipment. What do I do with it? Show Answer
- I see there are new Unit Assemblage Listings for my Medical Equipment Sets (MESs). How can my unit get the lastest and most modern MESs available? Hide Answer

  1. Ensure you accurately report shortages in your Unit Status Report. Your higher headquarters up to FORSCOM and the Department of the Army need to know your equipment readiness. Your commander can subjectively downgrade your unit's readiness rating if he/she identifies a shortfall in clinical capability. Also, the Army mandates the use of the Army Equipment Common Operating Picture (ECOP), which is on the HQs Department of the Army SIPR site, to post MTOE shortages as well as Operational Needs Statements (ONSs).

  2. If you are deploying and your sets have a clinical shortfall, identify and communicate that shortfall through your chain of command. When we are notified and verify the shortage or clinical weakness, USAMMA will fill the shortage or upgrade the clinical capability.

  3. If you are not part of a modernization program or deploying, and still want to upgrade your sets, then your command can fund the modernization. This is done by
